RE: Hazardous Waste Fees Schedules – New Mexico Environment Department

Members:

Per a Sept. 19, 2019 email from the The New Mexico Environment Department (NMED) Hazardous Waste Bureau (HWB), the HWB is revising 20.4.3 NMAC Hazardous Waste Fee.

The Bureau writes, “The fees have not been updated since their adoption in 1995. The new fee simplifies the calculations by eliminating the 0.01 per pound calculation and replaces it with flat annual fee. Included in the new rule is a fee for Very Small Quantity Generators (VSQG) of \$100 per year.”

To read and review the announcement, please click below.
