Yates Family Legacy Companies

Dear Members of the Independent Petroleum Association of New Mexico,

Since the completion of the first commercial oil well (Illinois #3 in Eddy County) on state lands in New Mexico in 1924, our family has been intertwined with the economy and cultural life of New Mexico. The **Yates Family Legacy Companies** are ONCE AGAIN proud to link our family back to IPANM as the proud **2025 IPANM Annual Meeting's Presenting Sponsor**. IPANM's mission to protect, defend, and promote the role of independent producers in New Mexico matches the pioneering spirit of Martin Yates, Jr., who started it all so many years ago.

We never could have predicted that the oil boom in the New Mexico Permian would continue to this day! In 1978, members of our family, with others, decided that New Mexico needed a collective voice to amplify the specific issues impacting independent producers throughout the state. Thus, **IPANM** was born!

Join us this year as IPANM will honor Peyton Yates, IPANM's FIRST BOARD PRESIDENT! We look forward to recognizing this great association's first leader on July 11, 2025 during our morning meeting session. It will prove to be a very special moment for our family and for the entire IPANM family. See you at Sandia Hotel & Casino!

Highest regards,

Peyton & Hanson Yates	Harvey & Emmons Yates	George & Lauren Yates	Frank, Jr. & Mary Yates	John A Yates Sr. Family	Fred Yates & Becky Yates Pemberton

Now visitors from all over the nation and New Mexicans looking for a place to get away, can get lost in the lights and sounds of the casino floor, relax at the luxurious Green Reed Spa, dive into the outdoor pool, tee off on the 18-hole championship golf course, listen to their favorite singer at the outdoor amphitheater, dine at any of the numerous restaurants, bars, and lounges, get married to their best friend, and spend the night in one of the grand, luxury suites – all available onsite.

The premise that humans and nature cannot co-exist, whereby humankind encroaches on wildlife is simply untrue. When the Alaskan pipeline was being built, environmentalists feared the fate of the caribou saying the animals would suffer immensely. The exact opposite happened. The number of caribou has quintupled since production began in early 1978. The equipment provided windbreak, warmth, and shelter.

In 2004, IPANM created a contest where oilfield workers and others could win cash prizes for the best photo or video demonstrating wildlife adapting to manmade changes in their environment.

You can help celebrate the wildlife in the oilfield by entering your own photos to win cash prizes! Winners photos will be published to our popular Wildlife webpage! Click below for more information.
